

2020 Presidential Election: North CarolinaOct 30 – Oct 31 2020

Methodology & Sample Profile

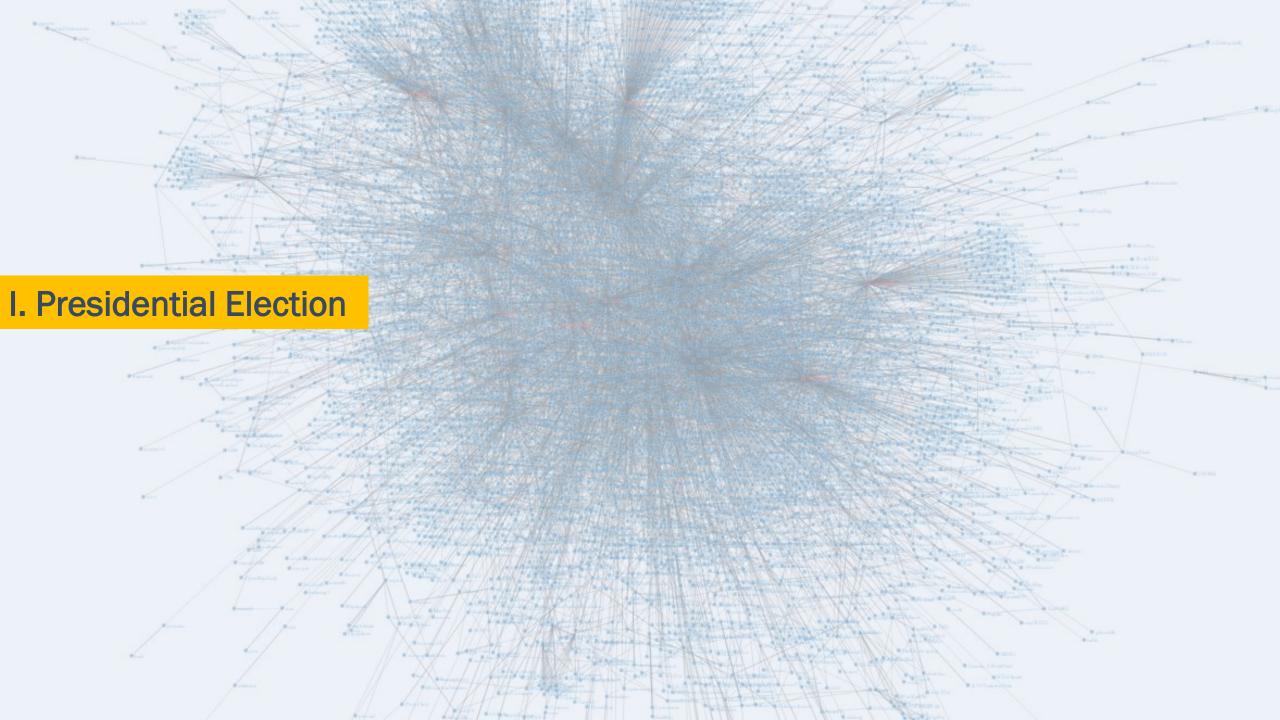

This study was conducted by AtlasIntel, an independent research & data intelligence firm.

Random interviews of North Carolina adults were conducted online between October 30 and October 31 2020. The sample was post-stratified with propensity scores to match the profile of registered voters on the following variables: gender, region, age group, education, family income, and race. Results are reported for 812 likely voters. The margin of error for likely voters is +/-3% at the 95% confidence level. Some percentages do not add up to 100% due to rounding.

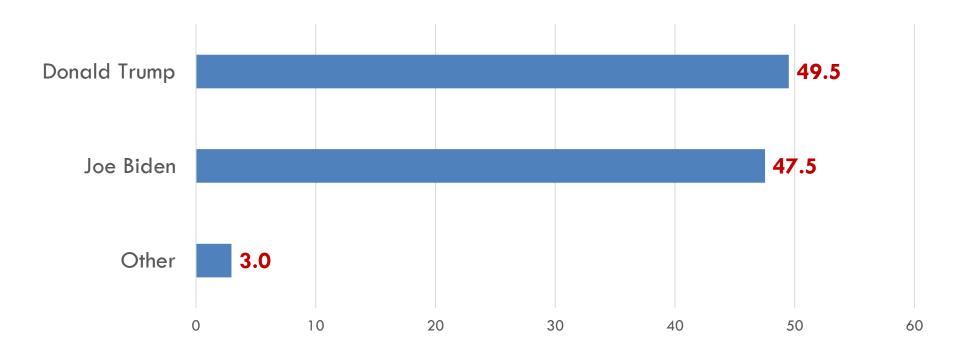

More information about AtlasIntel can be obtained by visiting www.atlasintel.org.
