

2020 Presidential Election: Michigan

Oct 30 – Oct 31 2020

Methodology & Sample Profile

This study was conducted by AtlasIntel, an independent research & data intelligence firm.

Random interviews of Michigan adults were conducted online between October 30 and October 31 2020. The sample was post-stratified with propensity scores to match the profile of registered voters on the following variables: gender, region, age group, education, family income, and race. Results are reported for 686 likely voters. The margin of error for likely voters is +/-4% at the 95% confidence level. Some percentages do not add up to 100% due to rounding.

More information about AtlasIntel can be obtained by visiting www.atlasintel.org.

Gender		Partisanship (self-reported)	
Female	48.3%	Democrats	32.9%
Male	51.7%	Republicans	25.4%
		Independents	41.8%
